INDEX TO AUTHORS

A

ADELSTEIN, R. S. See SCORDILIS, ANDERSON, POLLACK, and ADELSTEIN, 940

ANDERSON, EVERETT. See DUCIBELLA, UKENA, KARNOVSKY, and ANDERSON, 153

ANDERSON, J. L. See SCORDILIS, ANDERSON, POLLACK, and ADELSTEIN, 940

ANDERSON, RICHARD G. W. Biochemical and cytochemical evidence for ATPase activity in basal bodies isolated from oviduct, 547

—. See BASU, ANDERSON, GOLDSTEIN, and BROWN, 119

ATTARDI, GIUSEPPE. See POSAKONY, ENGLAND, and ATTARDI, 468

B

BAJER, ANDREW S. See RIEDER and BAJER, 717

BALIN, ARTHUR K., GOODMAN, DAVID B. P., RASMUSSEN, HOWARD, and CRISTOFALO, VINCENT J. The effect of oxygen and vitamin E on the lifespan of human diploid cells in vitro, 58

BARD, JONATHAN B. L., and HIGGINSON, KAROLE. Fibroblast-collagen interactions in the formation of the secondary stroma of the chick cornea, 816

BARKER, J. L. See LASEK, GAINER, and BARKER, 501

BASTE, CLAUDIA A. See NOE, BASTE, and BAUER, 578, 589

BASU, SANDIP K., ANDERSON, RICHARD G. W., GOLDSTEIN, JOSEPH L., and BROWN, MICHAEL S. Metabolism of cationized lipoproteins by human fibroblasts. Biochemical and morphologic correlations, 119

BAUER, G. ERIC. See NOE, BASTE, and BAUER, 578, 589

BELL, PAUL B., JR. Locomotory behavior, contact inhibition and pattern formation of 3T3 and polyoma virus-transformed 3T3 cells in culture, 963

BELLVÉ, ANTHONY R., CAVICCHIA, J. C., MILLETTE, CLARKE F., O'BRIEN, DEBORAH A., BHATNAGAR, Y. M., and DYM, MARTIN. Spermatogenic cells of the prepuberal mouse. Isolation and morphological characterization, 68

—. See MILLETTE and BELLVÉ, 86

BERNAERT, DENISE, WANSON, JEAN-CLAUDE, DROCHMANS, PIERRE, and POPOWSKI, ANYA. Effect of insulin on ultrastructure and glycogenesis in primary cultures of adult rat hepatocytes, 878

BERZINS, KLAVS. See COHEN, BLOMBERG, BERZINS, and SIEKEVITZ, 181

BHATNAGAR, Y. M. See BELLVÉ, CAVICCHIA, MILLETTE, O'BRIEN, BHATNAGAR, and DYM, 68

BLOMBERG, FRED, COHEN, ROCHELLE S., and SIEKEVITZ, PHILIP. The structure of postsynaptic densities isolated from dog cerebral cortex. II. Characterization and arrangement of some of the major proteins within the structure, 204

BLOMBERG, FRED. See COHEN, BLOMBERG, BERZINS, and SIEKEVITZ, 181

BROWN, MICHAEL S. See BASU, ANDERSON, GOLDSTEIN, and BROWN, 119

BULLOCK, P. N. See GILLER, NEALE, BULLOCK, SCHRIER, and NELSON, 16

BURGESS, DAVID R., and SCHROEDER, THOMAS E. Polarized bundles of actin filaments within microvilli of fertilized sea urchin eggs, 1032

BURWEN, SUSAN JO, and SATIR, BIRGIT H. Plasma membrane folds on the mast cell surface and their relationship to secretory activity, 690

C

CAHILL, MARY ANNE. See MURDOCK, CAHILL, and REITH, 326

CASPAR, D. L. D., GOODENOUGH, D. A., MAKOWSKI, LEE, and PHILLIPS, W. C. Gap junction structures. I. Correlated electron microscopy and X-ray diffraction, 605

—. See MAKOWSKI, CASPAR, PHILLIPS, and GOODENOUGH, 629

CAVICCHIA, J. C. See BELLVÉ, CAVICCHIA, MILLETTE, O'BRIEN, BHATNAGAR, and DYM, 68

CHAKRABORTY, JYOTSNA. See SCHROEDER, CHAKRABORTY, and SOLOFF, 428

CHAN, A. C., and WALKER, IAN G. Loss of DNA repair capacity during successive subcultures of primary rat fibroblasts, 365

CHATTERJEE, R. N., and MUKHERJEE, A. S. Chromosomal basis of dosage compensation in *Drosophila*. IX. Cellular autonomy of the faster replication of the X chromosome in haplo-X cells of *Drosophila melanogaster* and synchronous initiation, 168

CHOWRASHI, PROKASH K., and PEPE, FRANK A. Light meromyosin paracrystal formation, 136

CHUA, NAM-HAI, and GILLHAM, NICHOLAS W. The sites of synthesis of the principal thylakoid membrane polypeptides in *Chlamydomonas reinhardtii*, 441

CLARKE, F. M. See MORTON, CLARKE, and MASTERS, 1016

COHEN, ROCHELLE S., BLOMBERG, FRED, BERZINS, KLAVS, and SIEKEVITZ, PHILIP. The structure of postsynaptic densities isolated from dog cerebral cortex. I. Overall morphology and protein composition, 181

—. See BLOMBERG, COHEN, and SIEKEVITZ, 204

CONDEELIS, JOHN S., and TAYLOR, D. LANSING. The contractile basis of amoeboid movement. V. The control of gelation, solation, and contraction in extracts from *Dictyostelium discoideum*, 901

COONS, L. W., and ESPEY, L. L. Quantitation of nexus junctions in the granulosa cell layer of rabbit ovarian follicles during ovulation, 321
CRISTOFALO, VINCENT J. See BALIN, GOODMAN, RASMUSSEN, and CRISTOFALO, 58

INDEX TO SUBJECTS

A

Acinar cells, rat exorbital lacrimal gland, relationship between Golgi apparatus, GERL, and secretory granules, cytochemistry and EM, 399

Acrosome reaction, guinea pig spermatozoa, membrane particle changes, freeze-fracture EM, 561

Actin filaments, interaction with fructose diphosphate aldolase, biochemistry and EM, 1016

– filaments, polarized bundles within microvilli of fertilized sea urchin eggs, 1032

– microfilaments, myosin subfragment binding for localization of, cultured cells, biochemistry and light and EM, 794

Actomyosin system, nonmuscle cells, regulation of motility, review article, 1

Aging, effect of oxygen and vitamin E on lifespan of human diploid fibroblasts, autoradiography and cytology, 58

–, sheep erythrocytes, in vitro rearrangements of membrane components, biochemistry and freeze-fracture EM, 389

Alga *Chlamydomonas reinhardtii*, flagella, role of tip structures in microtubule assembly, phase contrast and EM, 747

– *Chlamydomonas reinhardtii*, thylakoid membrane, sites of polypeptide synthesis, biochemistry, 441

– *Diatoma vulgare*, central spindle, mechanism of anaphase elongation, light and EM serial sections, 377

AMP, cyclic, effect on morphological transformation, normal rat kidney cells infected by temperature-sensitive mouse sarcoma virus, biochemistry and phase contrast, 707

–, cyclic, iontophoretic release of, melanosome dispersion, frog melanophore, biochemistry, 928

Amylase retention after calcium release by ionophore A-23187, rat parotid gland secretory granules, biochemistry and EM, 789

Anaphase spindle elongation, *Diatoma vulgare*, light and EM serial sections, 377

Anglerfish *Lophius americanus*, pancreatic islets, subcellular distribution of peptide hormones and proinsulin and proglucagon, biochemistry, 589

– *Lophius americanus*, pancreatic islets, subcellular fractionation, proinsulin and proglucagon biosynthesis, biochemistry and EM, 578

Annulate lamellae, phloem cells, virus-infected *Sonchus* plants, EM, 111

Antibody binding, thyroglobulin, rat thyroid sections, autoradiographic light and EM and cytochemistry and immunology, 992

–, myosin, effect on division of starfish blastomeres, biochemistry and immunochemistry, 251

Antigens, membrane, temporal expression of during mouse spermatogenesis, immunofluorescence and cytotoxicity, 86

Astacus leptodactylus, sphincter muscle, prismatic cristae in mitochondria, EM, 326

Asterias amurensis, blastomeres, effect of myosin antibody on division of, biochemistry and immunochemistry, 251

Astrocytes, murine, normal and SV40-transformed, myosin phosphorylating system, biochemistry and immunofluorescence, 940

ATPase activity, chicken oviduct basal bodies, biochemistry and cytochemical EM, 547

–, Ca^{++}- and Mg^{++}-dependent, localization of, rat skeletal muscle cells, sarcoplasmic reticulum assembly, biochemistry and immunofluorescence, 287

Axon, giant, squid, cell-to-cell transfer of glial proteins, glia-neuron protein transfer hypothesis, biochemistry, 501

–, giant, squid, glia-neuron protein transfer, intracellular perfusion, 524

B

Basal bodies, chicken oviduct, ATPase activity, biochemistry and cytochemical EM, 547

Blastomeres, mouse embryo, changes in cell surface and cortical cytoplasmic organization during early embryogenesis, transmission and scanning EM, 153

–, starfish, effect of myosin antibody on division of, biochemistry and immunochemistry, 251

Brain, rat, neurofilaments, immunofluorescence, 241

–, rat, tubulin, polymerized and depolymerized forms, colchicine binding assay and EM, 341

Bull, spermatozoa, RNA polymerase activity, biochemistry, 698

C

Calcium distribution, frog striated muscle, effect of hypertonicity, electron probe analysis of cryo sections, 828

– release by ionophore A-23187, amylase retention after, rat parotid gland secretory granules, biochemistry and EM, 789

– role in regulation of motility, nonmuscle cells, review article, 1

Calsequestrin, localization of, rat skeletal muscle cells, sarcoplasmic reticulum assembly, biochemistry and immunofluorescence, 287

Cell cycle, HeLa cells, mitochondrial growth and division during, autoradiographic light and EM, 468

Cells, chick embryo neural retina, developmental decline in DNA repair, biochemistry, 274

–, chick embryo neural retina, effects of cytosine arabinoside on glutamine synthetase accumulation, biochemistry and immunochemistry, 30

–, Chinese hamster V79 fibroblasts, adhesion of phospholipid vesicles, role of cell surface proteins, autoradiographic and biochemistry and fluorescence and scanning EM, 531

–, CHO, endoplasmic reticulum membrane, effect of puromycin on binding of viral glycoprotein messenger RNA, biochemistry, 358
Cells, HeLa, membrane-bound polyribosome complexes, entry of vesicular stomatitis virus glycoprotein G mRNA, biochemistry, 43
–, HeLa strain F-315, mitochondrial growth and division during cell cycle, autoradiography and light and EM, 468
–, human and chick embryonic fibroblasts, distribution of fibronectin during mitosis and interphase, autoradiography and immunofluorescence and scanning EM, 453
–, human fibroblasts, metabolism of cationized lipoproteins, biochemistry and light and EM, 119
–, human melanoma LeCa and mouse L, nuclear pore complexes, elimination and reconstruction during mitosis, phase and EM, 492
–, lung, newt *Taricha granulosa*, heat-induced reversible hexagonal packing of spindle microtubules, EM, 717
–, mammary gland, lactating rat, oxytocin binding, biochemistry and EM, 428
–, nonmuscle, regulation of motility, review article, 1
–, normal rat kidney infected by temperature-sensitive mouse sarcoma virus, cyclic AMP-induced morphological transformation, biochemistry and phase contrast, 707
–, normal and SV40-transformed murine astrocytes, myosin phosphorylating system, biochemistry and immunofluorescence, 940
–, proximal, distal tubule and renin-active, homogeneous cell populations from rabbit kidney cortex, electrophoresis and EM, 780
–, rat embryo and rat kangaroo Pt K1, myosin subfragment binding for localization of actin-like microfilaments, biochemistry and light and EM, 794
–, rat fibroblasts, loss of DNA repair capacity during successive subcultures, biochemistry, 365
–, rat skeletal muscle, assembly of sarcoplasmic reticulum, protein localization, biochemsitry and immunofluorescence, 287
–, spermatogenic, prepuberal mouse, light and EM, 68
–, 3T3 and polyoma virus-transformed 3T3, locomotion, contact inhibition, and pattern formation in cultures, time lapse cinemicrography and EM, 963
–, untransformed permanent lines, transformation-sensitive adhesive cell surface glycoprotein, biochemistry and immunofluorescence, 649
–, WI-38 fibroblasts, effect of oxygen and vitamin E on lifespan of, autoradiography and cytology, 58
Cell sections, estimation of three-dimensional cytological parameters from two-dimensional measurements, 485
Cerebral cortex, dog, structure of postsynaptic density, characterization of major proteins, biochemistry and immunology and EM, 204
– cortex, dog, structure of postsynaptic density, overall morphology and protein composition, biochemistry and EM, 181
Chick, cornea, secondary stroma formation, fibroblast-collagen interactions, Nomarski optics, 816
–, oviduct, basal bodies, ATPase activity, biochemistry and cytochemical EM, 547
Chick, skeletal muscle, light meromyosin paracrystal formation, biochemistry and EM, 136
Chlamydomonas reinhardtii, flagella, role of tip structures in microtubule assembly, phase contrast and EM, 747
– *reinhardtii*, thylakoid membrane, sites of polypeptide synthesis, biochemistry, 441
Cholesterol accumulation, human fibroblasts, effect of cationized lipoproteins, biochemistry and light and EM, 119
Choline acetyltransferase, murine spinal cord and skeletal muscle co-cultures, biochemistry and Nomarski and phase-contrast micrography, 16
Chromosome basis of dosage compensation, *Drosophila* salivary gland haplo-X cells, autoradiography, 168
Colchicine binding, measurement of polymerized and depolymerized tubulin, rat brain and liver, biochemistry and EM, 341
Collagen and fibroblast interactions, secondary stroma formation, chick cornea, Nomarski optics, 816
Complexes, nuclear pore, elimination and reconstruction during mitosis, human melanoma LeCa and mouse L cells, phase and EM, 492
Concanavalin A agglutinability, NRK cells infected by temperature-sensitive mouse sarcoma virus, effect of cyclic AMP, biochemistry and phase contrast, 707
– A receptors, galactose-binding proteins, *Dictyostelium discoideum* plasma membrane, biochemistry and immunoelectrophoresis, 264
Contact inhibition, 3T3 and polyoma virus-transformed 3T3 cells in culture, time lapse cinemicrography and EM, 963
Contraction, control of in *Dictyostelium discoideum* movement, biochemistry and light and EM, 901
Cornea, chick, secondary stroma formation, fibroblast-collagen interactions, Nomarski optics, 816
Corrections 333, 655
Crayfish *Astacus leptodactylus*, sphincter muscle, prismatic cristae in mitochondria, EM, 326
Cristae, prismatic, mitochondria of crayfish muscle, EM, 326
Cytomembrane electron contrast, role of phosphatidyl choline in tannic acid enhancement, EM, 742
Cytoplasm, cortical organization and cell surface changes, mouse preimplantation embryo, transmission and scanning EM, 153
– streaming, regulation by calcium, nonmuscle cells, review article, 1
Cytosine arabinoside, effect on glutamine synthetase accumulation, chick embryo neural retina, biochemistry and immunochemistry, 30

D

Density, postsynaptic, dog cerebral cortex, characterization of major proteins, biochemistry and immunology and EM, 204
–, postsynaptic, dog cerebral cortex, overall morphology and protein composition, biochemistry and EM, 181
Desmosomes and tight junction differentiation, rat hepatocytes in primary monolayer culture, light and cytochemical and freeze-etch EM, 858
Diatoma vulgare, central spindle, mechanism of anaphase elongation, light and EM serial sections, 377

Dictyostelium discoideum, control of gelation, solation, and contraction, biochemistry and light and EM, 901
– *discoideum,* plasma membrane, concanavalin A receptors, galactose-binding proteins, biochemistry and immunoelectrophoresis, 264
DNA repair capacity, loss of during successive subcultures, rat fibroblasts, biochemistry, 365
– repair, developmental decline in, chick embryo neural retina cells, biochemistry, 274
Dog, cerebral cortex, structure of postsynaptic density, characterization of major proteins, biochemistry and immunology and EM, 204
–, cerebral cortex, structure of postsynaptic density, overall morphology and protein composition, biochemistry and EM, 181
Dosage compensation, chromosomal basis, *Drosophila* salivary gland haplo-X cells, autoradiography, 168
Drosophila melanogaster, salivary gland, haplo-X cells, chromosomal basis of dosage compensation, autoradiography, 168

E

Ejaculation, rabbit spermatozoa, lectin-binding sites on plasma membrane after, EM, 950
Electron contrast, cytomembrane, role of phosphatidyl choline in tannic acid enhancement of, EM, 742
Element distribution, frog striated muscle, effect of hypertonicity, electron probe analysis of cryo sections, 828
Embryo, preimplantation, mouse, changes in cell surface and cortical cytoplasmic organization during early embryogenesis, transmission and scanning EM, 153
Endoplasmic reticulum membranes, CHO cells, effect of puromycin on binding of viral glycoprotein messenger RNA, biochemistry, 358
Enzyme, amylase retention after calcium release by ionophore A-23187, rat parotid gland secretory granules, biochemistry and EM, 789
–, ATPase activity, chicken oviduct basal bodies, biochemistry and cytochemical EM, 547
–, ATPase, Ca^{++}- and Mg^{++}-dependent, localization of, rat skeletal muscle cells, sarcoplasmic reticulum assembly, biochemistry and immunofluorescence, 287
–, choline acetyltransferase, murine spinal cord and skeletal muscle co-culture, biochemistry and Nomarski and phase-contrast micrography, 16
–, fructose diphosphate aldolase, interaction with actin-containing filaments, biochemistry and EM, 1016
–, glutamine synthetase accumulation, effets of cytosine arabinoside, chick embryo neural retina, biochemistry and immunochemistry, 30
–, RNA polymerase activity, bovine spermatozoa, biochemistry, 698
Epididymis, rabbit spermatozoa plasma membrane, lectin-binding sites after maturation of, EM, 950
Erythrocyte, sheep, membrane component rearrangements during in vitro aging, biochemistry and freeze-fracture EM, 389

F

Fiber types, red, white, and intermediate, rat skeletal muscle, myosin polymorphism, immunocytochemistry, 760
Fibroblast and collagen interactions, secondary stroma formation, chick cornea, Nomarski optics, 816
Fibronectin distribution during mitosis and interphase, human and chick embryonic fibroblasts, autoradiography and immunofluorescence and scanning EM, 453
Filaments, actin, interaction with fructose diphosphate aldolase, biochemistry and EM, 1016
–, actin-like, myosin subfragment binding for localization of, cultured cells, biochemistry and light and EM, 794
–, distal, *Chlamydomonas* flagellar microtubules, role in assembly of, phase contrast and EM, 747
–, neuro-, rat and human peripheral and central nervous system, immunofluorescence, 241
–, neuro-, rat peripheral nerve, biochemistry and immune EM, 226
Flagella, *Chlamydomonas,* elongation and shortening of, role of tip structures in microtubule assembly, phase contrast and EM, 747
Folds, plasma membrane surface, rat mast cells, relationship to secretory activity, biochemistry and scanning EM, 690
Frog *Rana pipiens,* skin melanophore, iontophoretic cyclic AMP release and melanosome dispersion, biochemistry, 928
– *Rana pipiens,* striated muscle, elemental distribution, effects of hypertonicity, electron probe analysis of cryo sections, 828
Fructose diphosphate aldolase, interaction with actin-containing filaments, biochemistry and EM, 1016
Fucolipid composition, NRK cells infected by temperature-sensitive mouse sarcoma virus, effect of cyclic AMP, biochemistry and phase contrast, 707

G

Galactose-binding proteins, concanavalin A receptors, *Dictyostelium discoideum* plasma membrane, biochemistry and immunoelectrophoresis, 264
Gelation, control of in *Dictyostelium discoideum,* contractile basis of amoeboid movement, biochemistry and light and EM, 901
–, regulation by calcium, nonmuscle cells, review article, 1
Gene expression, glutamine synthetase accumulation, effects of cytosine arabinoside, chick embryo neural retina, biochemistry and immunochemistry, 30
GERL, Golgi apparatus, and secretory granules, acinar cells, rat exorbital lacrimal gland, cytochemistry and EM, 399
Glia and neuron protein transfer, squid giant axon, biochemistry, 501
– and neuron protein transfer, squid giant axon, intracellular perfusion, 524
Glutamine synthetase accumulation, effects of cytosine arabinoside, chick embryo neural retina, biochemistry and immunochemistry, 30
Glycogenesis, rat hepatocytes in primary monolayer culture, effect of insulin, biochemistry and light and EM, 878
Glycoprotein G mRNA, vesicular stomatitis virus, entry of into membrane-bound polyribosome complexes, HeLa cells, biochemistry, 43
– messenger RNA, viral, binding to endoplasmic reticu-

lum membrane, CHO cells, effect of puromycin, biochemistry, 358
Glycoprotein, transformation-sensitive adhesive, cell surface of untransformed permanent cell lines, biochemistry and immunofluorescence, 649
Golgi apparatus, GERL, and secretory granules, acinar cells, rat exorbital lacrimal gland, cytochemistry and EM, 399
Granules, secretion, membrane interactions between primate intestinal mucosa, freeze-fracture EM, 983
–, secretory, anglerfish pancreatic islets, proinsulin and proglucagon biosynthesis, biochemistry and EM, 578
–, secretory, Golgi apparatus, and GERL, acinar cells, rat exorbital lacrimal gland, cytochemistry and EM, 399
–, secretory, rat parotid gland, amylase retention after calcium release by ionophore A-23187, biochemistry and EM, 789
Granulosa cell layer, rabbit ovarian follicles, nexus junctions during ovulation, EM, 321
Guinea pig, spermatozoa, acrosome reaction, membrane particle changes, freeze-fracture EM, 561

H

Heat induction of reversible hexagonal packing of spindle microtubules, newt lung cells, EM, 717
Hepatocytes, rat, primary monolayer culture, effect of insulin on ultrastructure and glycogenesis, biochemistry and light and EM, 878
–, rat, primary monolayer culture, intercellular contacts and cell membrane differentiations, light and cytochemical and freeze-etch EM, 858
Hormone, insulin, effect on ultrastructure and glycogenesis, rat hepatocytes in primary monolayer culture, biochemistry and light and EM, 878
–, proinsulin and proglucagon biosynthesis, subcellular fractionation, anglerfish pancreatic islets, biochemistry and EM, 578
–, proinsulin and proglucagon, subcellular distribution, anglerfish pancreatic islets, biochemistry, 589
–, thyroglobulin antigenicity, localization of in rat thyroid, autoradiographic light and EM and cytochemistry and immunology, 992
Human, blood leukocytes, role of tubulin-microtubule system in lymphocyte activation by lectins, biochemistry, 371
–, lymphocytes and platelets, total tubulin and polymerized tubulin, physiological regulation, biochemistry, 351
–, peripheral nerve neurofilaments, immunofluorescence, 241
–, rectal mucosa, membrane interactions between adjacent secretion granules, freeze-fracture EM, 983
Hypercholesterolemia, familial, fibroblast metabolism of cationized lipoproteins, biochemistry and light and EM, 119
Hypertonicity, effect on element distribution, frog striated muscle, electron probe analysis of cryo sections, 828

I

Insect *Drosophila melanogaster*, salivary gland, haplo-X cells, chromosomal basis of dosage compensation, autoradiography, 168
Insulin, effect on ultrastructure and glycogenesis, rat hepatocytes in primary monolayer culture, biochemistry and light and EM, 878
Interphase and mitosis, chick and human embryonic fibroblasts, distribution of fibronectin during, autoradiography and immunofluorescence and scanning EM, 453
Intestine, large, human and monkey, membrane interactions between adjacent mucosal secretion granules, freeze-fracture EM, 983
Ionophore A-23187, release of calcium, amylase retention after, rat parotid gland secretory granules, biochemistry and EM, 789
Iontophoresis, cyclic AMP release, melanosome dispersion, frog melanophore, biochemistry, 928

J

Junctions, gap, mouse liver, structural model, X ray diffraction analysis, 629
–, gap, mouse liver, structure characterization by biochemistry and X-ray diffraction and EM, 605
–, intercellular, peritoneal mesothelium, rat and mouse, freeze-fracture EM, 98
–, nexus, rabbit ovarian follicles, granulosa cell layer, during ovulation, EM, 321
–, tight, and desmosomes, rat hepatocytes in primary monolayer culture, light and cytochemical and freeze-etch EM, 858

K

Kidney cortex, rabbit, homogeneous cell populations, isolation of proximal, distal tubule and renin-active cells, electrophoresis and EM, 780
Kinetochore microtubules, heat-induced reversible hexagonal packing of, newt lung cells, EM, 717

L

Lacrimal gland, exorbital, acinar cells, rat, relationship between Golgi apparatus, GERL, and secretory granules, cytochemistry and EM, 399
Lamellar bodies, rat lung, formation of tubular myelin from, EM, 1027
Lattice structure, gap junction, mouse liver, correlation of biochemistry and X-ray diffraction and EM, 605
Lectin activation of human lymphocytes, role of tubulin-microtubule system, biochemistry, 371
Lectin-binding sites, rabbit spermatozoa plasma membrane, changes during epididymal maturation and after ejaculation, EM, 950
Lipid distribution, gap junction, mouse liver, X-ray diffraction analysis, 629
Lipoproteins, cationized, metabolism of, human fibroblasts, biochemistry and light and EM, 119
Liver, mouse, gap junction structure, correlation of biochemistry and X-ray diffraction and EM, 605
–, mouse, gap junction structure, X-ray diffraction analysis, 629
–, neonatal rat, effect of Su-13 437 (nafenopin) on peroxisomes, autoradiography, 665
–, primate *Tupaia belangeri*, nerve fiber characteristics, efferent innervation, autoradiography and fluorescence and EM, 299
–, rabbit, rough microsomal vesicles, polypeptide syn-

thesis in messenger-dependent reticulocyte system, biochemistry and EM, 315
Liver, rat and mouse, total tubulin and polymerized tubulin, physiological tubulin, physiological regulation, biochemistry, 351
–, rat, rough microsomes, release of poly A(+) messenger RNA after polysome disassembly, biochemistry, 414
–, rat, tubulin, polymerized and depolymerized forms, colchicine binding assay and EM, 341
Locomotion, 3T3 and polyoma virus-transformed 3T3 cells in culture, time lapse cinemicrography and EM, 963
Loligo pealei, giant axon, cell-to-cell transfer of glial proteins, glia-neuron protein transfer hypothesis, biochemistry, 501
– *pealei*, giant axon, glia-neuron protein transfer, intracellular perfusion, 524
Lophius americanus, pancreatic islets, subcellular distribution of peptide hormones and proinsulin and proglucagon, biochemistry, 589
– *americanus*, pancreatic islets, subcellular fractionation, proinsulin and proglucagon biosynthesis, biochemistry and EM, 578
Lung, rat, formation of tubular myelin from lamellar bodies, EM, 1027
–, rat, type II pneumocytes, preservation of ultrastructure in phosphatidyl cholines by tannic acid, biochemistry and EM, 726
Lymphocytes, human peripheral, role of tubulin-microtubule system in activation of by lectins, biochemistry, 371
–, human, total tubulin and polymerized tubulin, physiological regulation, biochemistry, 351

M

Mammary gland cells, lactating rat, oxytocin binding, biochemistry and EM, 428
Mast cells, peritoneal, rat, plasma membrane folds on cell surface, relationship to secretory activity, biochemistry and scanning EM, 690
Melanophore, frog skin, iontophoretic cyclic AMP release and melanosome dispersion, biochemistry, 928
Melanosome dispersion, iontophoretic cyclic AMP release, frog melanophore, biochemistry, 928
Membrane antigens, temporal expression of during mouse spermatogenesis, immunofluorescence and cytotoxicity, 86
–differentiations and intercellular contacts, rat hepatocytes in primary monolayer culture, light and cytochemical and freeze-etch EM, 858
–electron contrast, role of phosphatidyl choline in tannic acid enhancement of, EM, 742
–interactions between adjacent secretion granules, primate intestinal mucosa, freeze-fracture EM, 983
–, lamellar bodies, rat lung, formation of tubular myelin, EM, 1027
–particle changes, acrosome reaction, guinea pig spermatozoa, freeze-fracture EM, 561
–topography and cortical cytoplasmic organization during early embryogenesis, mouse preimplantation embryo, transmission and scanning EM, 153
Membranes, endoplasmic reticulum, CHO cells, effect of puromycin on binding of viral glycoprotein messenger RNA, biochemistry, 358
–, erythrocyte, sheep, rearrangement of components during in vitro aging, biochemistry and freeze-fracture EM, 389
–, HeLa cells, polyribosome complexes, entry of vesicular stomatitis virus glycoprotein G mRNA, biochemistry, 43
–, plasma, *Dictyostelium discoideum*, concanavalin A receptors, galactose-binding proteins, biochemistry and immunoelectrophoresis, 264
–, plasma, rabbit spermatozoa, lectin-binding sites, changes during epididymal maturation and after ejaculation, EM, 950
–, plasma, rat mast cells, cell surface folds, relationship to secretory activity, biochemistry and scanning EM, 690
–, thylakoid, *Chlamydomonas reinhardtii*, sites of polypeptide synthesis, biochemistry, 441
Meromyosin paracrystal formation, chicken muscle, biochemistry and EM, 136
Mesothelium, peritoneal, rat and mouse, organization of cell junctions, freeze-fracture EM, 98
Microsomes, anglerfish pancreatic islets, proinsulin and proglucagon biosynthesis, biochemistry and EM, 578
–, rough, rabbit liver, polypeptide synthesis in messenger-dependent reticulocyte system, biochemistry and EM, 315
–, rough, rat liver, release of poly A(+) messenger RNA after polysome disassembly, biochemistry, 414
Microtubules, central spindle, *Diatoma vulgare*, mechanism of anaphase elongation, light and EM serial sections, 377
–, *Chlamydomonas* flagella, role of tip structures in assembly of, phase contrast and EM, 747
–, spindle, heat-induced reversible hexagonal packing of, newt lung cells, EM, 717
–, and tubulin system, role in human lymphocyte activation by lectins, biochemistry, 371
Mitochondria, bovine spermatozoa, RNA polymerase activity, biochemistry, 698
–, crayfish muscle, prismatic cristae, EM, 326
–, HeLa cells, growth and division of during cell cycle, autoradiographic light and EM, 468
Mitosis, human melanoma LeCa and mouse L cells, elimination and reconstruction of nuclear pore complexes, phase and EM, 492
– and interphase, chick and human embryonic fibroblasts, distribution of fibronectin during, autoradiography and immunofluorescence and scanning EM, 453
Monkey, rectal mucosa, membrane interactions between adjacent secretion granules, freeze-fracture EM, 983
Motility regulation, nonmuscle cells, review article, 1
Mouse, embryo, preimplantation, changes in cell surface and cortical cytoplasmic organization during early embryogenesis, transmission and scanning EM, 153
–, liver, gap junction structure, correlation of biochemistry and X-ray diffraction and EM, 605

Mouse, liver, gap junction structure, X-ray diffraction analysis, 629
–, peritoneal mesothelium, organization of cell junctions, freeze-fracture EM, 98
–, prepuberal, spermatogenic cells, light and EM, 68
–, spinal cord and skeletal muscle co-culture, choline acetyltransferase activity, biochemistry and Nomarski and phase-contrast micrography, 16
–, testis, temporal expression of membrane antigens during spermatogenesis, immunofluorescence and cytotoxicity, 86
Mucosa, human and monkey large intestine, membrane interactions between adjacent secretion granules, freeze-fracture EM, 983
Muscle, skeletal, chicken, light meromyosin paracrystal formation, biochemistry and EM, 136
–, skeletal, rat, myosin polymorphism among fiber types, immunocytochemistry, 760
–, skeletal, and spinal cord›co-culture, murine, choline acetyltransferase activity, biochemistry and Nomarski and phase-contrast micrography, 16
–, sphincter, crayfish, prismatic cristae in mitochondria, EM, 326
–, striated, frog, elemental distribution, effects of hypertonicity, electron probe analysis of cryo sections, 828
Myelin, tubular, formation of from lamellar bodies, rat lung, EM 1027
Myosin antibody, effect on division of starfish blastomeres, biochemistry and immunochemistry, 251
–, chicken muscle, light meromyosin paracrystal formation, biochemistry and EM, 136
– phosphorylating system, normal and SV40-transformed murine astrocytes, biochemistry and immunofluorescence, 940
– polymorphism among rat skeletal muscle fiber types, immunocytochemistry, 760
– subfragment binding for localization of actin-like microfilaments, cultured cells, biochemistry and light and EM, 794

N

Nafenopin (Su-13 437), effect on peroxisome proliferation, neonatal rat liver, autoradiography, 665
Nerve fiber characteristics, efferent innervation, primate liver, autoradiography and fluorescence and EM, 299
–, peripheral, human and rat, neurofilaments, immunofluorescence, 241
–, peripheral, rat, isolation of neurofilaments, biochemistry and immune EM, 226
Neurofilament protein, postsynaptic density, dog cerebral cortex, biochemistry and immunology and EM, 204
Neurofilaments, rat and human peripheral and central nervous system, immunofluorescence, 241
–, rat peripheral nerve, biochemistry and immune EM, 226
Neuron and glia protein transfer, squid giant axon, biochemistry, 501
– and glia protein transfer, squid giant axon, intracellular perfusion, 524
Nexus junctions, rabbit ovarian follicles, granulosa cell layers, during ovulation, EM, 321
Nuclear pore complexes, elimination and reconstruction during mitosis, human melanoma LeCa and mouse L cells, phase and EM, 492

O

Ovary, rat, follicular granulosa cell layer, nexus junctions during ovulation, EM, 321
Oviduct, chicken, basal bodies, ATPase activity, biochemistry and cytochemical EM, 547
Ovulation, rabbit ovarian follicles, nexus junctions in granulosa cell layer, EM, 321
Oxygen, effect on lifespan of human diploid fibroblasts, autoradiography and cytology, 58
Oxytocin binding, mammary gland cells, lactating rat, biochemistry and EM, 428

P

Pancreas, islets, anglerfish, subcellular distribution of peptide hormones and proinsulin and proglucagon, biochemistry, 589
–, islets, anglerfish, subcellular fractionation, proinsulin and proglucagon biosynthesis, biochemistry and EM, 578
–, rat, total tubulin and polymerized tubulin, physiological regulation, biochemistry, 351
Paracrystal formation, light meromyosin, chicken muscle, biochemistry and EM, 136
Parotid gland, rat, secretory granules, amylase retention after calcium release by ionophore A-23187, biochemistry and EM, 789
Pattern formation, 3T3 and polyoma virus-transformed 3T3 cells in culture, time lapse cinemicrography and EM, 963
Peptide hormone precursors, subcellular distribution, anglerfish pancreatic islets, biochemistry, 589
Peritoneum, mesothelium, mouse and rat, organization of cell junctions, freeze-fracture EM, 98
Peroxisome proliferation, neonatal rat liver, effect of Su-13 437 (nafenopin), autoradiography, 665
Phloem cells, virus-infected *Sonchus* plants, annulate lamellae in EM, 111
Phosphatidyl choline, role in tannic acid enhancement of cytomembrane electron contrast, EM, 742
Phosphatidyl choline ultrastructure, preservation by tannic acid, model systems and rat type II pneumocytes, biochemistry and EM, 726
Phospholipid vesicle adhesion to Chinese hamster fibroblasts, role of cell surface proteins, autoradiography and biochemistry and fluorescence and scanning EM, 531
Phosphorylation, myosin, normal and SV40-transformed murine astrocytes, biochemistry and immunofluorescence, 940
Plant, sowthistle *Sonchus oleraceus*, virus-infected, annulate lamellae in phloem cells, EM, 111
Platelets, human, total tubulin and polymerized tubulin, physiological regulation, biochemistry, 351
Pneumocytes, type II, rat lung, preservation of ultrastructure in phosphatidyl cholines by tannic acid, biochemistry and EM, 726
Polypeptide synthesis, *Chlamydomonas reinhardtii* thylakoid membranes, biochemistry, 441
– synthesis on rabbit liver rough microsomes, messenger-dependent reticulocyte system, biochemistry and EM, 315

Polyribosome complexes, membrane-bound, HeLa cells, entry of vesicular stomatitis virus glycoprotein G mRNA, biochemistry, 43
Polysome disassembly, release of poly A(+) messenger RNA, rat liver rough microsomes, biochemistry, 414
Postsynaptic density, dog cerebral cortex, characterization of major proteins, biochemistry and immunology and EM, 204
– density, dog cerebral cortex, overall morphology and protein composition, biochemistry and EM, 181
Proinsulin and proglucagon biosynthesis, subcellular fractionation, anglerfish pancreatic islets, biochemistry and EM, 578
– and proglucagon, subcellular distribution, anglerfish pancreatic islets, biochemistry, 589
Protein characterization and arrangement, postsynaptic density, dog cerebral cortex, biochemistry and immunology and EM, 204
– composition, postsynaptic density, dog cerebral cortex, biochemistry and EM, 181
– distribution, gap junction, mouse liver, X-ray diffraction analysis, 629
–, fibronectin distribution during mitosis and interphase, human and chick embryonic fibroblasts, autoradiography and immunofluorescence and scanning EM, 453
–, galactose-binding, concanavalin A receptors, *Dictyostelium discoideum* plasma membrane, biochemistry and immunoelectrophoresis, 264
–, glia-neuron transfer, squid giant axon, biochemistry, 501
–, glia-neuron transfer, squid giant axon, intracellular perfusion, 524
– localization, sarcoplasmic reticulum, rat skeletal muscle cells, biochemistry and immunofluorescence, 287
–, surface, role in adhesion of phospholipid vesicles to Chinese hamster fibroblasts, autoradiography and biochemistry and fluorescence and scanning EM, 531
Protozoan, amoeba *Dictyostelium discoideum*, control of gelation, solation, and contraction, biochemistry and light and EM, 901
–, amoeba *Dictyostelium discoideum*, plasma membrane, concanavalin A receptors, galactose-binding proteins, biochemistry and immunoelectrophoresis, 264
Puromycin, effect on binding of viral glycoprotein messenger RNA to endoplasmic reticulum membranes, CHO cells, biochemistry, 358

R

Rabbit, kidney cortex, homogeneous cell populations, isolation of proximal, distal tubule and renin-active cells, electrophoresis and EM, 780
–, liver, rough microsomal vesicles, polypeptide synthesis in messenger-dependent reticulocyte system, biochemistry and EM, 315
–, spermatozoa, plasma membrane lectin-binding sites, changes during epididymal maturation and after ejaculation, EM, 950
Radioactive label, [^{14}C]ethylenediamine hydrochloride, [^{14}C]oleic acid, and [^{125}I]sodium iodide, metabolism of cationized lipoproteins, human fibroblasts, biochemistry and light and EM, 119
Radioactive label, [^{14}C]formaldehyde and [^{3}H]leucine, glia-neuron protein transfer, squid giant axon, intracellular perfusion, 524
– label, [^{14}C]fucose and 2-deoxy-D-[^{3}H]glucose, cyclic AMP-induced morphological transformation, normal rat kidney cells infected by temperature-sensitive mouse sarcoma virus, biochemistry and phase contrast, 707
– label, [^{14}C]glucosamine and [^{125}I]sodium iodide, transformation-sensitive adhesive cell surface glycoprotein, untransformed permanent cell lines, biochemistry and immunofluorescence, 649
– label, [^{14}C]glucose and UDP-[^{14}C]glucose, effect of insulin on ultrastructure and glycogenesis, rat hepatocytes in primary monolayer culture, biochemistry and light and EM, 878
– label, [^{14}C]isoleucine and [^{3}H]tryptophan, subcellular distribution of peptide hormones and proinsulin and proglucagon, anglerfish pancreatic islets, biochemistry, 589
– label, *N*-[^{14}C]acetoxy acetylaminofluorene, [^{14}C]-methyl methanesulfonate, and [^{3}H]thymidine, developmental decline in DNA repair, chick embryo neural retina cells, biochemistry, 274
– label, [^{14}C]sodium acetate, sites of synthesis of thylakoid membrane polypeptides, *Chlamydomonas reinhardtii*, biochemistry, 441
– label, ^{14}C- and ^{3}H-labeled amino acids, chick embryo neural retina, effects of cytosine arabinoside on glutamine synthetase accumulation, biochemistry and immunochemistry, 30
– label, [^{14}C]- and [^{3}H]dimyristoyl lecithin, [^{3}H]-dipalmitoyl lecithin, and [^{125}I]sodium iodide, phospholipid vesicle adhesion to Chinese hamster fibroblasts, role of cell surface proteins, autoradiography and biochemistry and fluorescence and scanning EM, 531
– label, [^{14}C]- and [^{3}H]leucine, [^{3}H]arginine, [^{3}H]-glutamic acid, and [^{35}S]methionine, glia-neuron protein transfer hypothesis, squid giant axon, biochemistry, 582
– label, [^{14}C]- or [^{3}H]uridine, [^{3}H]amino acids, and [^{35}S]methionine, entry of vesicular stomatitis virus glycoprotein G mRNA into membrane-bound polyribosome complexes, HeLa cells, biochemstry, 43
– label, [^{45}Ca]calcium chloride, amylase retention after calcium release by ionophore A-23187, rat parotid gland secretory granules, biochemistry and EM, 789
– label, [^{45}Ca]calcium, [^{3}H]amino acids, [^{3}H]colchicine, [^{3}H]thymidine, and [^{3}H]uridine, role of tubulin-microtubule system in lymphocyte activation, biochemistry, 371
– label, [^{3}H]arginine, effect of Su-13 437 (nafenopin) on peroxisome proliferation, neonatal rat liver, autoradiography, 665
– label, [^{3}H]colchicine and [^{125}I]sodium iodide, polymerized and depolymerized tubulin, rat brain and liver, colchicine binding assay and EM, 351
– label, [^{3}H]cyclic AMP, [^{3}H]ADP, and [^{3}H]GMP, iontophoretic release of cyclic AMP, melanosome dispersion, frog melanophore, biochemistry, 928

Radioactive label, [^{3}H]dopamine, [^{3}H]epinephrine, [^{3}H]-norepinephrine, and [^{3}H]serotonin, efferent innervation, nerve fiber characteristics, primate liver, autoradiography and fluorescence and EM, 299
- label, [^{3}H]orotic acid, [^{3}H]poly A, [^{3}H]poly U, and [^{32}P]orthophosphate, release of poly A(+) messenger RNA after polysome disassembly, rat liver rough microsomes, biochemistry, 414
- label, [^{3}H]oxytocin, binding of oxytocin, mammary gland cells, lactating rat, biochemistry and EM, 428
- label, [^{3}H]thymidine, effect of oxygen and vitamin E on lifespan of human diploid fibroblasts, autoradiography and cytology, 58
- label, [^{3}H]thymidine, fibronectin distribution during mitosis and interphase, human and chick embryonic fibroblasts, autoradiography and immunofluorescence and scanning EM, 453
- label, [^{3}H]thymidine, loss of DNA repair capacity during successive subcultures, rat fibroblasts, biochemistry, 365
- label, [^{3}H]thymidine, total tubulin and polymerized tubulin, various tissues, physiological regulation, biochemistry, 351
- label, [^{125}I]insulin, proinsulin, and proglucagon biosynthesis, subcellular fractionation, anglerfish pancreatic islets, biochemistry and EM, 578
- label, [^{125}I]iodine, localization of thyroglobulin antigenicity, rat thyroid, autoradiographic light and EM and cytochemistry and immunology, 992
- label, [*methyl*-^{3}H]choline chloride, preservation of ultrastructure in phosphatidyl choline by tannic acid, model systems and rat type II pneumocytes, biochemistry and EM, 726
- label, [*methyl*-^{3}H]thymidine, mitochondrial growth and division during cell cycle, HeLa cells, autoradiographic light and EM, 468
- label, [^{32}P]ATP, myosin phosphorylating system, normal and SV40-transformed murine astrocytes, biochemistry and immunofluorescence, 940
- label, [^{32}P]orthophosphate, effect of puromycin on binding of viral glycoprotein messenger RNA to endoplasmic reticulum membranes, CHO cells, biochemistry, 358
Rana pipiens, skin melanophore, iontophoretic cyclic AMP release and melanosome dispersion, biochemistry, 928
- *pipiens*, striated muscle, elemental distribution, effects of hypertonicity, electron probe analysis of cryo sections, 828
Rat, brain and liver tubulin, polymerized and depolymerized forms, colchicine binding assay and EM, 341
–, exorbital lacrimal gland acinar cells, relationship between Golgi apparatus, GERL, and secretory granules, cytochemistry and EM, 399
–, hepatocytes, primary monolayer culture, effect of insulin on ultrastructure and glycogenesis, biochemistry and light and EM, 878
–, hepatocytes, primary monolayer culture, intercellular contacts and cell membrane differentiations, light and cytochemical and freeze-etch EM, 858
–, lactating, mammary gland cells, oxytocin binding, biochemistry and EM, 428
Rat, liver and pancreas, total tubulin and polymerized tubulin, physiological regulation, biochemistry, 351
–, liver, rough microsomes, release of poly A(+) messenger RNA after polysome disassembly, biochemistry, 414
–, lung, formation of tubular myelin from lamellar bodies, EM, 1027
–, lung, type II pneumocytes, preservation of ultrastructure in phosphatidyl cholines by tannic acid, biochemistry and EM, 726
–, neonatal, liver, effect of Su-13 437 (nafenopin) on peroxisomes, autoradiography, 665
–, ovary, follicular granulosa cell layer, nexus junctions during ovulation, EM, 321
–, parotid gland, secretory granules, amylase retention after calcium release by ionophore A-23187, biochemistry and EM, 789
–, peripheral nerve neurofilaments, biochemistry and immune EM, 226
–, peripheral nerve, spinal cord and brain, neurofilaments, immunofluorescence, 241
–, peritoneal mast cells, plasma membrane folds on cell surfaces, relationship to secretory activity, biochemistry and scanning EM, 690
–, peritoneal mesothelium, organization of cell junctions, freeze-fracture EM, 98
–, skeletal muscle, myosin polymorphism among fiber types, immunocytochemistry, 760
–, thyroid, localization of thyroglobulin antigenicity, autoradiographic light and EM and cytochemistry and immunology, 992
Receptors, surface, changes during epididymal maturation and after ejaculation, lectin-binding sites in rabbit spermatozoa plasma membrane, EM, 950
Renin-active cells, rabbit kidney cortex, isolation of homogeneous cell populations, electrophoresis and EM, 780
Reticulocyte system, messenger-dependent, polypeptide synthesis on rough microsomal vesicles, rabbit liver, biochemistry and EM, 315
Retina, chick embryo, effects of cytosine arabinoside on glutamine synthetase accumulation, biochemistry and immunochemistry, 30
–, neural, chick embryo, developmental decline in DNA repair, biochemistry, 274
RNA, messenger, glycoprotein G, vesicular stomatitis virus, entry of into membrane-bound polyribosome complexes, HeLa cells, biochemistry, 43
–, messenger, poly A(+), release after polysome disassembly, rat liver rough microsomes, biochemistry, 414
–, messenger, viral glycoprotein, binding to endoplasmic reticulum membrane, CHO cells, effect of puromycin, biochemistry, 358
– polymerase activity, bovine spermatozoa, biochemistry, 698

S

Salivary gland, *Drosophila melanogaster*, haplo-X cells, chromosomal basis of dosage compensation, autoradiography, 168
Sarcoplasmic reticulum, rat skeletal muscle cells, protein
